

We should ALL have interoperable Federally-funded Services for VRS calls and a choice to chose whatever VRS service we want when we want it and if we want it! This is like Microsoft taking over the entire computer industry....didnt MS get in a lot of legal trouble for that??? That's what SORENSON is doing! Hearing owned, hearing run, hearing decisions, hearing limitations and hearing rip offs of deaf people on services that are crucial to us-nothing new.

We as deaf and HOH people need the same kind of choices hearing people have with their phone service...so please acknowledge!
